

activaWrap[®]

Datasheet

Itemnumber	AW4532 // AW4552 // AW4752
Material	kraft paper
Grammage	80 g/m ²
Roll width (mm)	395, 500
Roll length (m)	100, 250
Colour	Nature, White, Red, Black

activaWrap[®]

Protective Material

activaWrap[®] is the environmentally friendly alternative to bubble wrap.

The honeycomb-like 3D structure interlocks when wrapped and thus guarantees the same product protection of fragile objects during transport as a bubble wrap made of plastic. The material is made of 100% die-cut kraft paper and is therefore a particularly environmentally friendly and innovative packaging solution.

activaWrap[®] is ideal as protective packaging for all fragile objects.

In contrast to bubble wrap, a product packed with activaWrap[®] has a high-quality appearance. This makes it ideal for packaging glassware, ceramics, jewellery and cosmetics.

Match the packaging to your product:

activaPaper[®] is also available in neutral white, red and black.

This makes each of your packages an eye-catcher.
