

MOBILE STRETCH WRAP MACHINE MSW/M

Versatile mobile wrapping system, easy to operate and manoeuvre, saves time by allowing pallets to be wrapped immediately without the need to take pallets to a machine.

Reduce injuries in the workplace by ensuring operators maintain an upright position throughout the wrapping process.

No electrical supply required, mechanically driven friction brake roller carriage and film tensioning ensures consistent film stretch on entire wrap.

Standard Specification:

- Max wrapping height 2.0 metres.
- Quick film loading.
- Mechanically driven film roller.
- Safety counterweight system.
- Brake on rear wheels.
- CE Approved.
